

1975 INDEX OF ARTICLES PUBLISHED IN
MATERIALS ENGINEERING

INDEX OF FEATURE ARTICLES

ALUMINUM AND ITS ALLOYS

Alloy development and new processes mark light metal forgings--Dec, p 28
Aluminum bumpers, body sheet can pare auto weight, cut cost--May, p 20
Aluminum P/M parts are strong, economical and they save weight--Apr, p 32
Copper versus aluminum for electrical conductors--Aug, p 48
Steel, nonferrous metals strengthen hold on appliances--Sept, p 20
Wrought aluminum and its alloys--Jan, p 55

CERAMICS

Biomedical materials: implants have a hostile host--March, p 14
Ceramic fibers fight heat in difficult environments--June, p 33
Magnetic materials--Oct, p 47
Materials for nuclear power systems--April, p 18

COATINGS

Electroless nickel plating gains many electronic applications--June, p 50
Energy needs can be reduced by switching to precoated metal--Oct, p 38
Finishes enliven appliances, help keep them running longer--Sept, p 23
Low energy curing urethanes offer tough, abrasion resistant finishes--May, p 58
New developments in plated plastics--July, p 34
Try metallizing to cut costs for bright, shiny plastic parts--March, p 42
Water-borne coatings--Aug, p 55
Water-borne paints cut auto costs, help reduce pollution--May, p 34
Wide choice of decorative surfaces offered by hot stamping foils--Jan, p 44

COBALT

Biomedical materials: implants have a hostile host--March, p 14
Magnetic materials--Oct, p 47

COMPOSITES

Consider composites to cut and control cacophony--Sept, p 82
Design with clad metals to save materials and cut production costs--March, p 48
Filled plastics and elastomer blends can cut cost, improve quality--May, p 30
Guide to design limits of RP molding methods--March, p 55
Microspheres cut costs, improve properties of plastics--April, p 58
Take a look at lead to lock out corrosion, radiation and noise--March, p 22
Wide choice of decorative surfaces offered by hot stamping foils--Jan, p 44

COPPER

Copper versus aluminum for electrical conductors--Aug, p 48
Wide choice of metals for spring applications--Aug, p 44

ELECTRICAL AND ELECTRONIC MATERIALS

Ceramic fibers fight heat in difficult environments--June, p 33
Copper versus aluminum for electrical conductors--Aug, p 48
Electroless nickel plating gains many electronic applications--June, p 50
Flame retardance, impact strength: dual concern for appliance plastics--Sept, p 29
Steel, nonferrous metals strengthen hold on appliances--Sept, p 20
Vulcanized fibre's many strengths: dielectric, tear and impact--May, p 44

FIBERS

Ceramic fibers fight heat in difficult environments--June, p 33
Primer on inorganic man-made fibers--Aug, p 20

FOILS

Wide choice of decorative surfaces offered by hot stamping foils--Jan, p 44

FORMING

Alloy development and new processes mark light metal forgings--Dec, p 28
Guide to design limits of RP molding methods--March, p 55

GLASS

Microspheres cut costs, improve properties of plastics--April, p 58

HIGH TEMPERATURE PROPERTIES AND MATERIALS

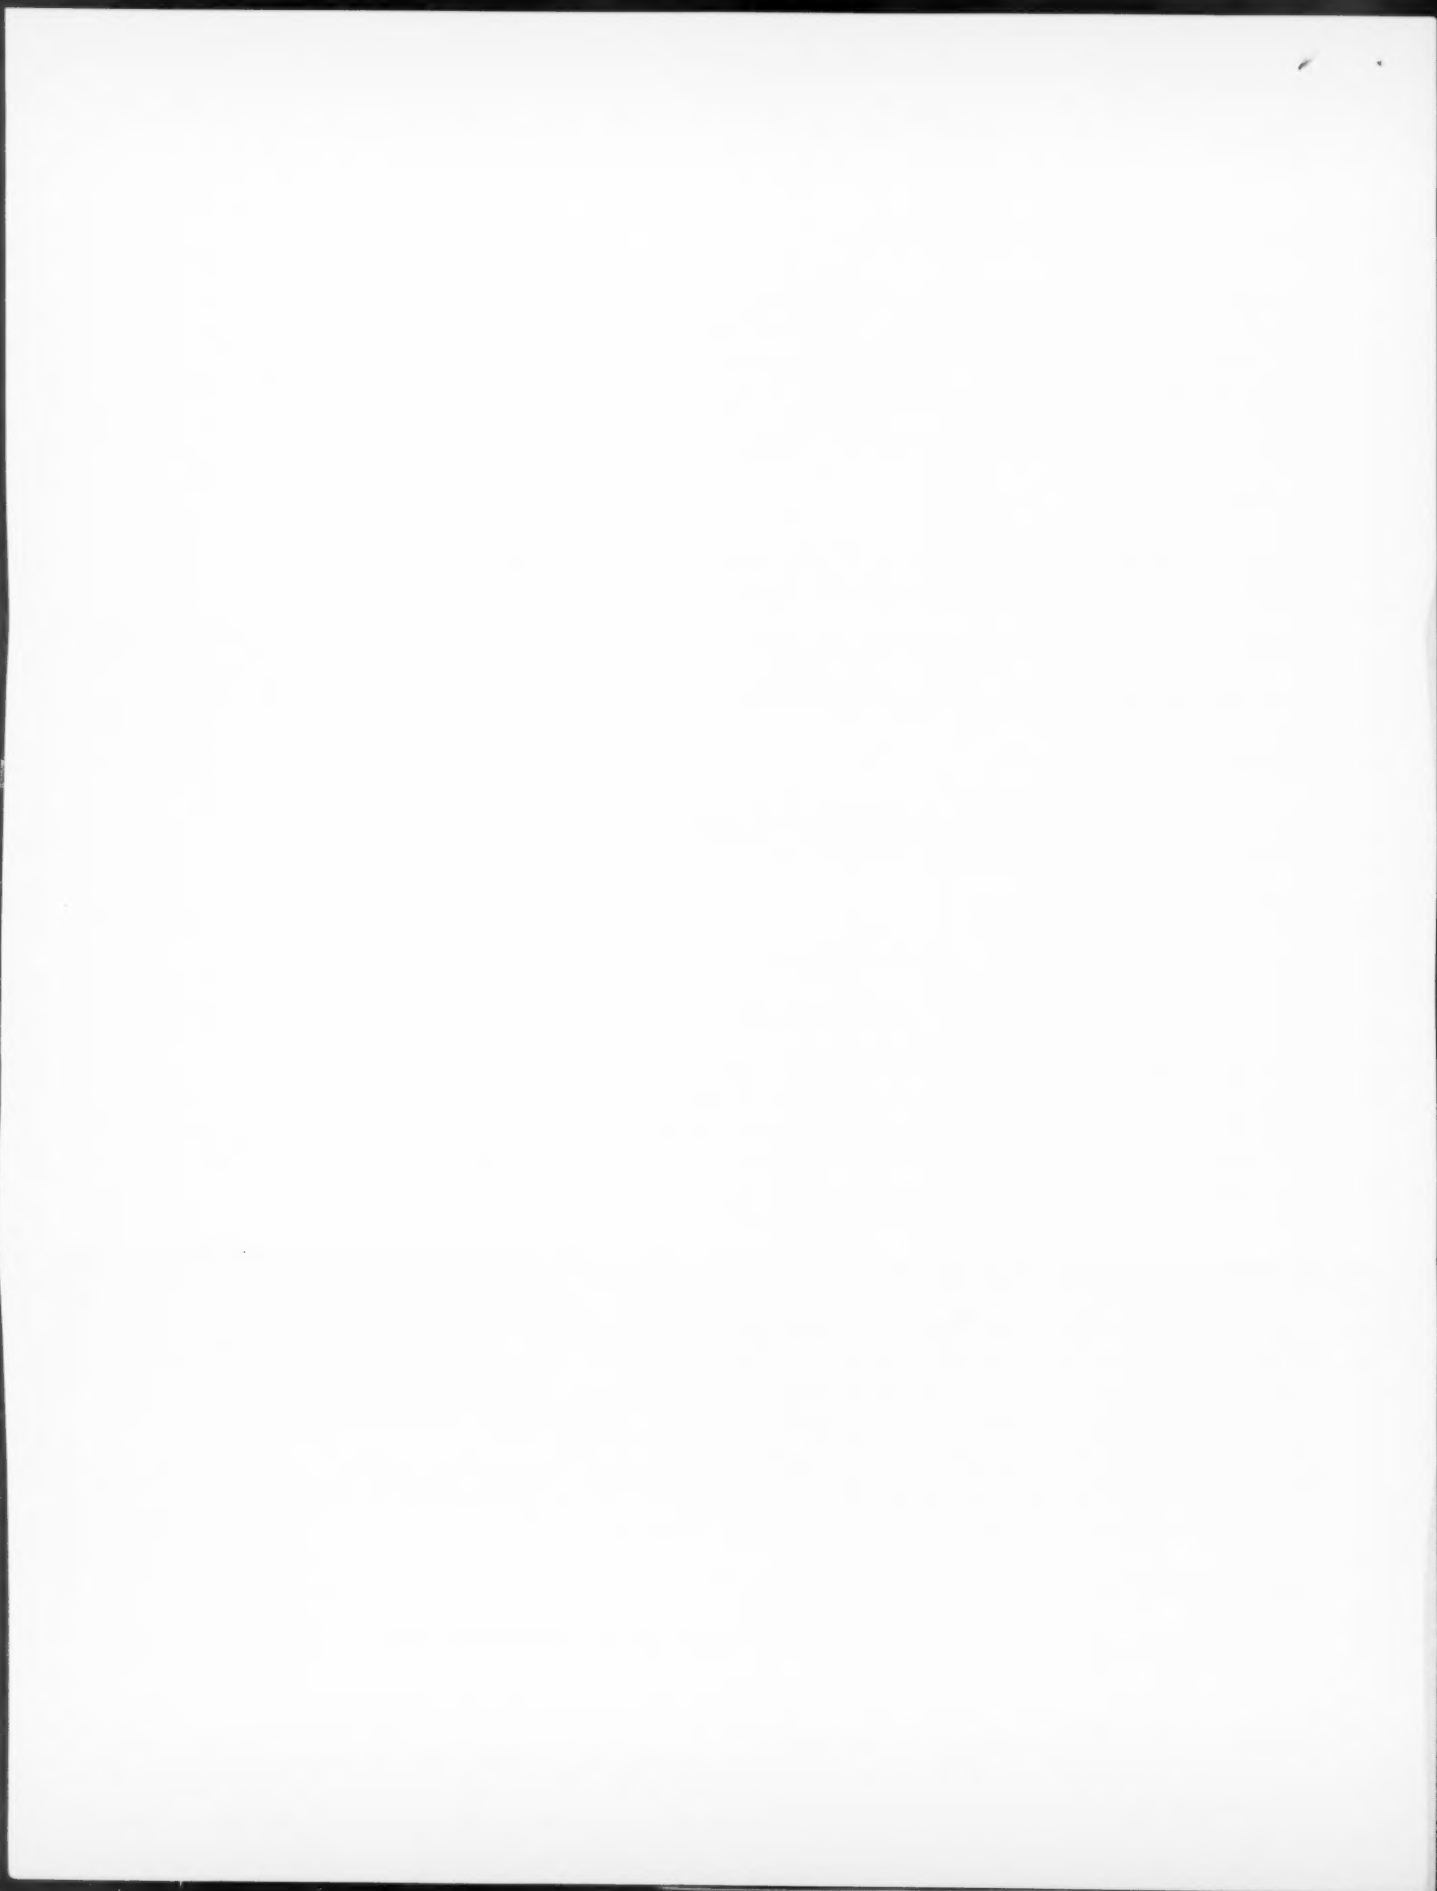

Ceramic fibers fight heat in difficult environments--June, p 33
Epoxies offer improved toughness, heat resistance--Aug, p 24
High temperature brazing demands careful selection of filler metals--Sept, p 52
How heat resistant thermoplastics compare at elevated temperatures--June, p 28
Materials for nuclear power systems--April, p 18
Refractory metal carbides fight wear, heat and corrosion--Nov, p 67

JOINING, FASTENING, SEALING

Adhesives and fasteners join in rivet-bonded assemblies--Dec, p 35
Advanced joining methods cut costs, speed automotive parts assembly--May, p 24
Combating fastener corrosion in mechanical assemblies--March, p 30
High temperature brazing demands careful selection of filler metals--Sept, p 52
New fluoroelastomer for sealing under extremes--Oct, p 25
Nonvacuum electron beam welds many metals, sizes, shapes--June, p 20
Try solventless adhesives to protect environment and worker--Nov, p 50
Which low temperature adhesive is best for you--May, p 52

MAGNESIUM AND ITS ALLOYS

Alloy development and new processes mark light metal forgings--Dec, p 28

MATERIALS APPLICATIONS

Aluminum bumpers, body sheet can pare auto weight--May, p 20
Aluminum P/M parts are strong, economical and they save weight--April, p 32
Biomedical materials: implants have a hostile host--March, p 14
Ceramic fibers fight heat in difficult environments--June, p 33
Consider composites to cut and control cacophony--Sept, p 82
Copper versus aluminum for electrical conductors--Aug, p 48
Design with clad metals to save materials and cut production costs--March, p 48
EPDM: versatile elastomer at reasonable cost--March, p 58
Electroless nickel plating gains many electronic applications--June, p 50
Filled plastics and elastomer blends can cut cost, improve quality--May, p 30
Finishes enliven appliances, help keep them running longer--Sept, p 23
Flame retardance, impact strength: dual concern for appliance plastics--Sept, p 29
Good stability in many chemicals keeps acetals moving into new uses--Jan, p 36
Lower costs, ease of fabrication open new uses for wrought zinc--July, p 22
Materials for nuclear power systems--April, p 18
New fluoroelastomers for sealing under extremes--Oct, p 25
New types, improved processes expand use of structural foam--Nov, p 38
Steel, nonferrous metals strengthen hold on appliances--Sept, p 20
Take a look at lead to lock out corrosion, radiation and noise--March, p 22
Try metallizing to cut costs for bright, shiny plastic parts--March, p 42
Water-borne paints cut auto costs, help reduce pollution--May, p 34
Wide choice of decorative surfaces offered by hot stamping foils--Jan, p 44
Wide choice of metals for spring applications--Aug, p 44

MISCELLANEOUS

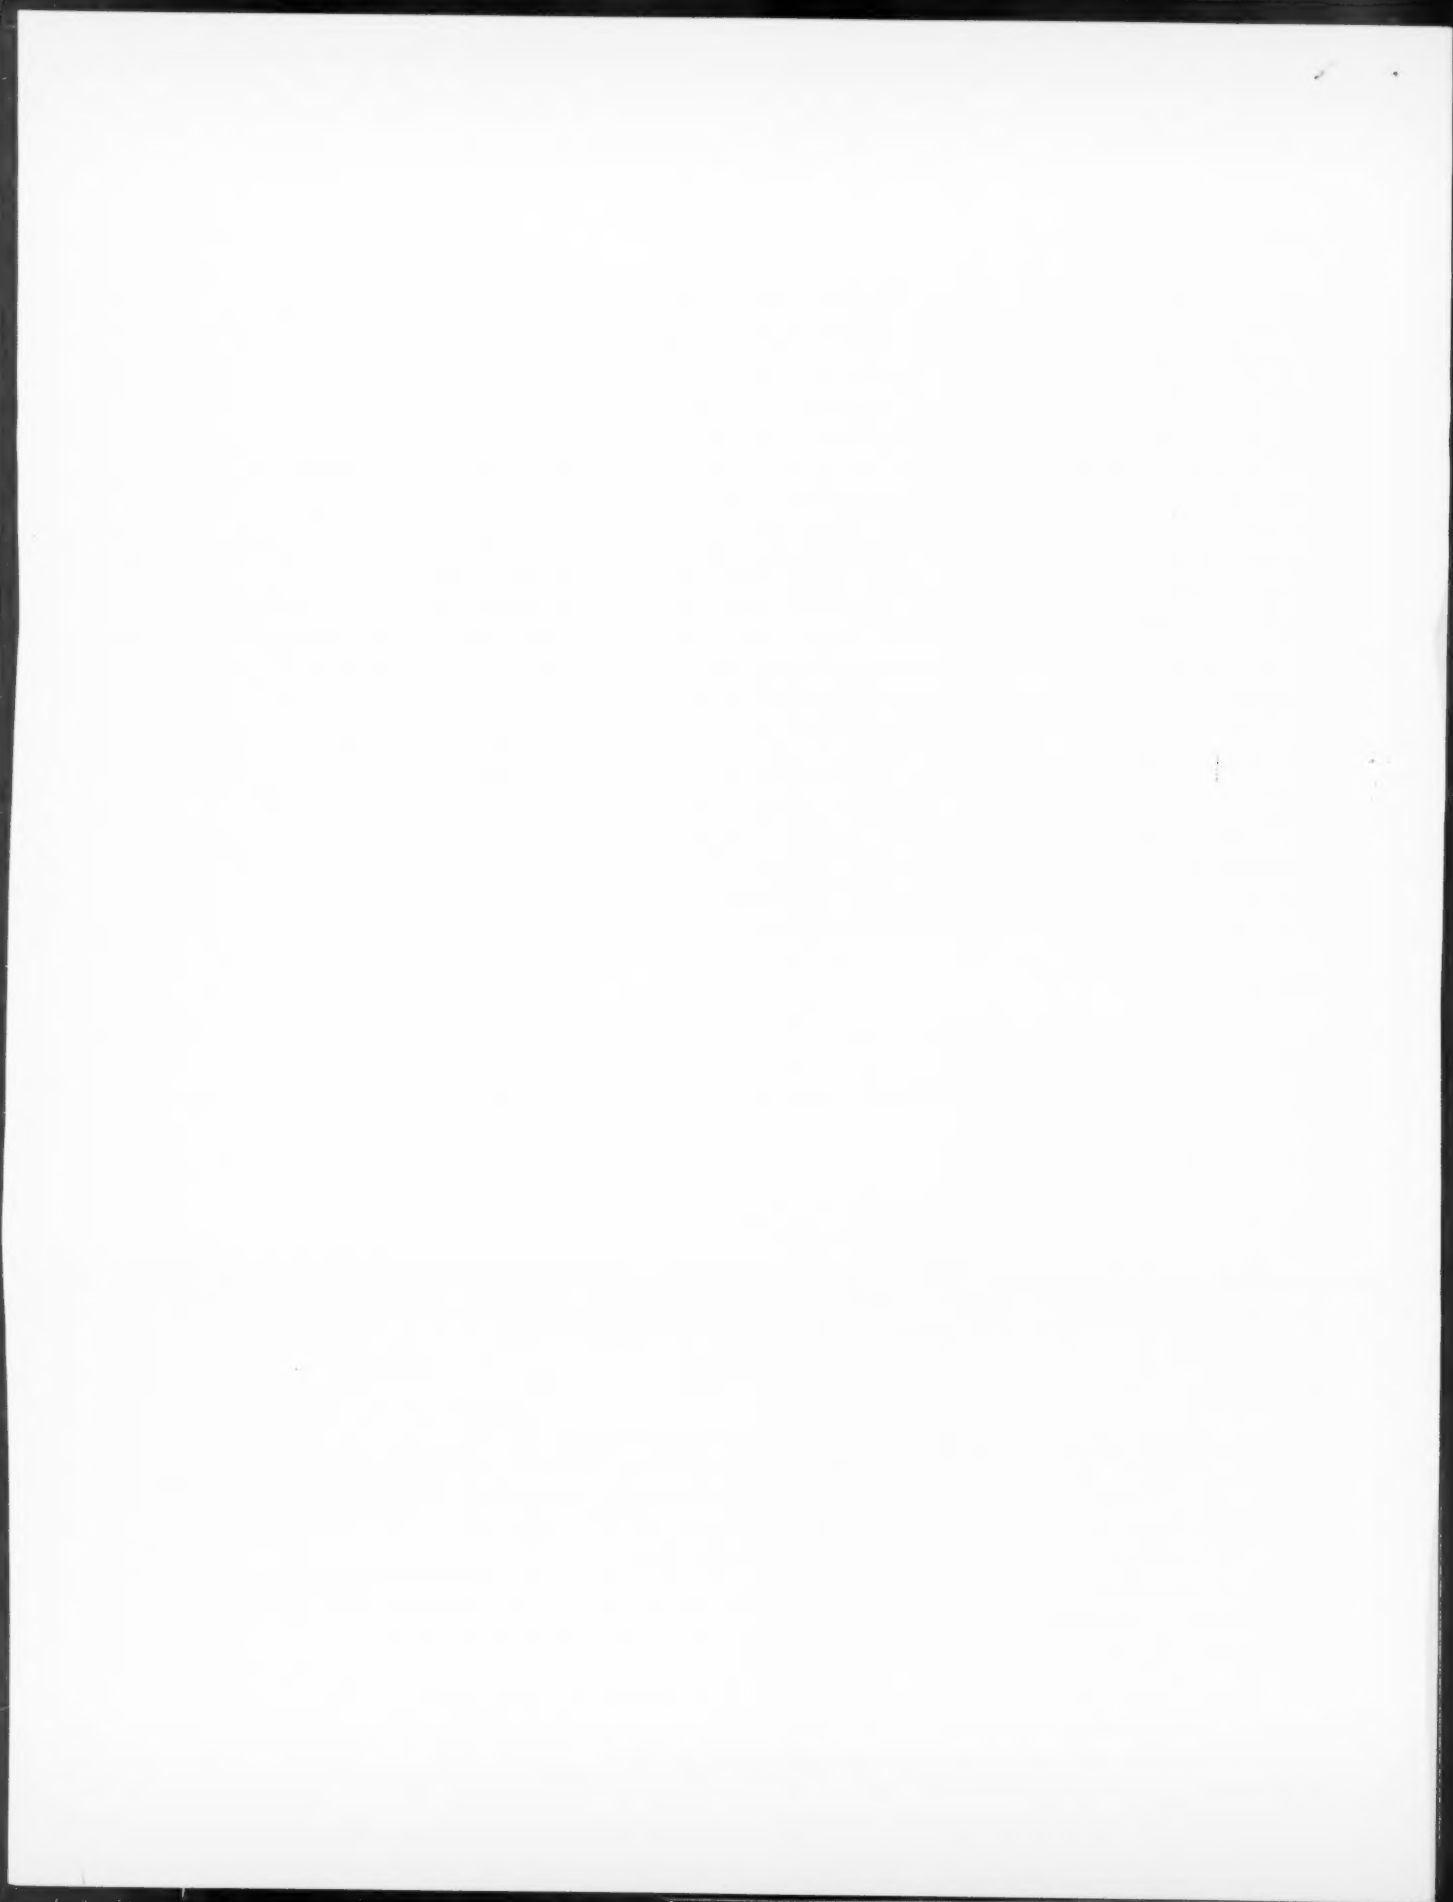

Comparison of materials--Feb, p 18
Economics of materials--Jan, p 20
Low-lead, no lead, lean mixtures: boon or bane to engine materials--May, p 26

NICKEL AND ITS ALLOYS

Computer aids metals selection for fatigue environments--Sept, p 70
How to avoid pitfalls in selecting metals for photofabrication--May, p 68
Magnetic materials--Oct, p 47
Materials for nuclear power systems--April, p 18
Wide choice of metals for spring applications--Aug, p 44

PLASTICS

Epoxies offer improved toughness, heat resistance--Aug, p 24
Filled plastics and elastomer blends can cut cost, improve quality--May, p 30
Flame retardance, impact strength: dual concern for appliance plastics--Sept, p 29
Good stability in many chemicals keeps acetals moving into new uses--Jan, p 36
Guide to design limits of RP molding methods--March, p 55
How heat resistant thermoplastics compare at elevated temperatures--June, p 33
Lightweight, transparent plastics have excellent impact resistance--Dec, p 42
Microspheres cut costs, improve properties of plastics--April, p 58
New developments in plated plastics--July, p 34
New types, improved processes expand use of structural foam--Nov, p 38
Nylon plastics--March, p 67
Polypropylenes are gaining in long term performance--Oct, p 22
Softening point of thermoplastics: Deflection temperature vs Vicat--April, p 52

RUBBER AND ELASTOMERS

Biomedical materials: implants have a hostile host--March, p 14
EPDM: versatile elastomer at reasonable cost--March, p 58
Epichlorohydrin elastomers resist environmental extremes--July, p 42
Filled plastics and elastomer blends can cut cost, improve quality--May, p 30
Guide to fluid resistance of rubber and elastomers--Jan, p 32
New fluoroelastomers for sealing under extremes--Oct, p 25
Pinning down the urethanes--Sept, p 90
Thermoplastic elastomers--Dec, p 47

STEELS AND IRON

Guide to ultra-high strength, heat treatable structural steels--April, p 38
High strength low alloy steels--July, p 45
Low-lead, no lead, lean mixtures: boon or bane to engine materials--May, p 26
Magnetic materials--Oct, p 47
Materials for nuclear power systems--April, p 18
New ferritic stainless steels beat stress corrosion, ease fabrication--Dec, p 24
Primer on inorganic, man-made fibers--Aug, p 20
Specialty carbon sheet steels can pare weight and cost--Nov, p 62
Steel, nonferrous metals strengthen hold on appliances--Sept, p 20
Wide choice of metals for spring applications--Aug, p 44

TANTALUM

Biomedical materials: implants have a hostile host--March, p 14
Refractory metal carbides fight wear, heat and corrosion--Nov, p 67

TESTING

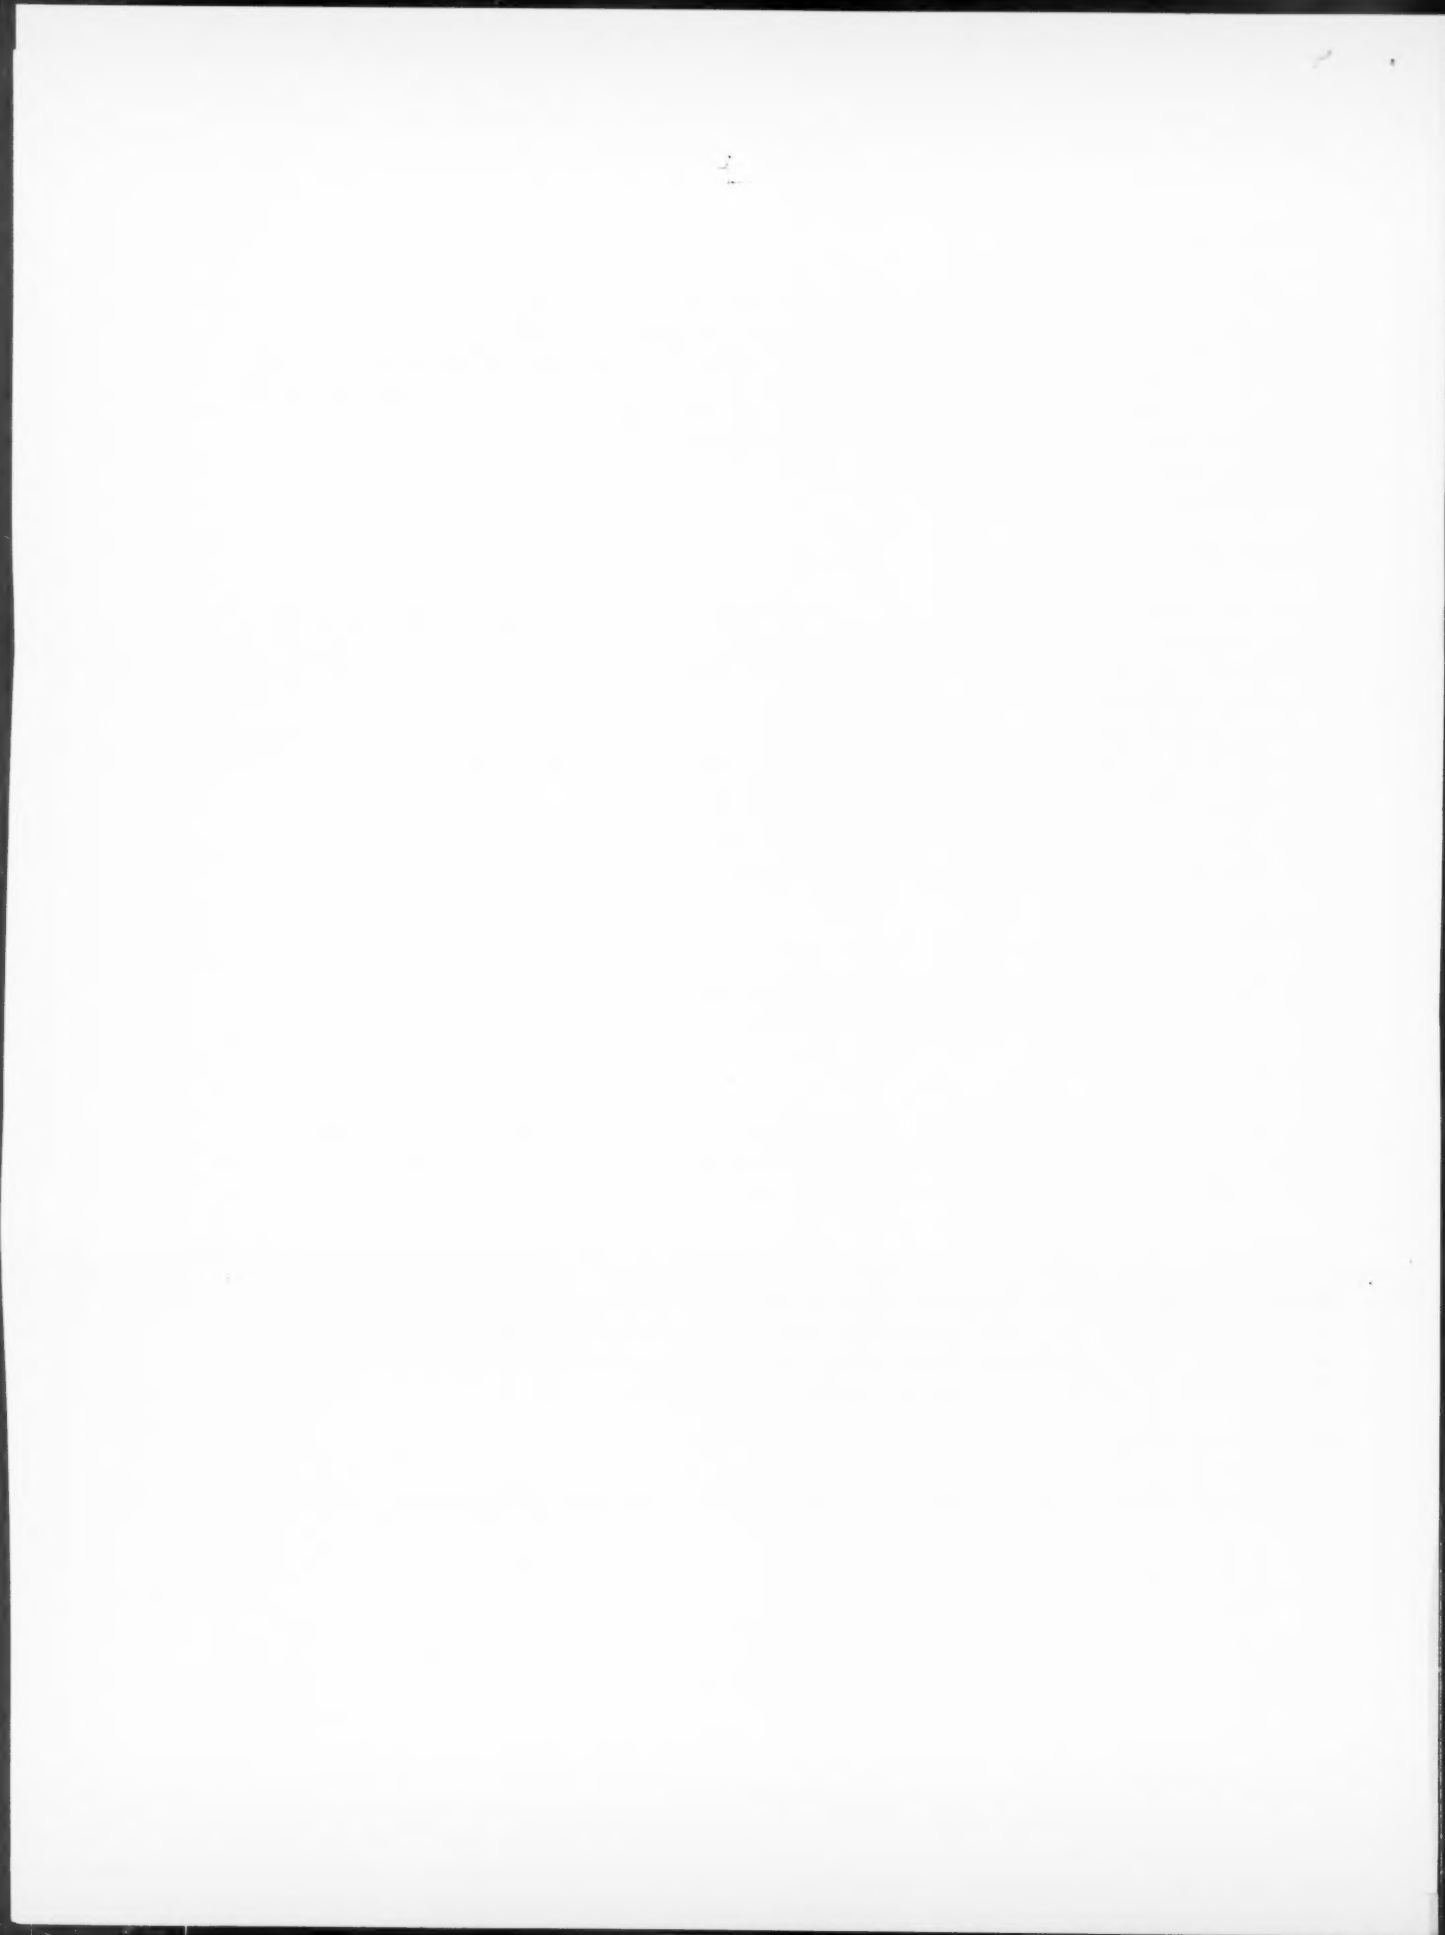

Computer aids metals selection for fatigue environments--Sept, p 70
Softening point of thermoplastics: Deflection temperature vs Vicat--April, p 52
What hardness tests for what materials--March, p 34

TITANIUM AND ITS ALLOYS

Biomedical materials: implants have a hostile host--March, p 14
Alloy development and new processes mark light metal forgings--Dec, p 28
Refractory metal carbides fight wear, heat and corrosion--Nov, p 67
Wide choice of metals for spring applications--Aug, p 44

VULCANIZED FIBRE

Vulcanized fibre's many strengths: dielectric, tear and impact--May, p 44
